

Manual Printing Notes

This manual has been generated as a pdf document and, due to the nature of the project, has been allowed to be posted on the forum as a single document.

Although it is recommended to print double sided in colour, the manual can be printed as single sided monochrome if you do not have access to a suitable colour/double sided printer.

There are a total of 68 pages split as follows

Front cover	2 pages un-numbered
Introduction	4 pages i to iv
Manual	62 pages numbered 1 to 62

Printing on an A4 printer (single or double sided)

In the print menu ensure that “Auto portrait/Landscape” is selected otherwise the landscape pages will be printed across the middle of the A4 sheet.

For double sided printing ensure that “Flip on long edge” is selected.

If you have access to an A3/A4 printer

Four of the pages, covering the Block diagram and circuit diagram (pages 15 & 16), the original circuit diagram and the ECC82 characteristic plots (pages 55 & 56) are intended to be printed on two A3 landscape sheets. This makes the circuit diagrams easier to read. The pages can be folded to A4 size to fit in with the rest of the manual.

Print all the pages bar the four landscape pages as A4, either single or double sided depending on the printer.

These pages are (page numbers are the pdf document page numbers)

Pages 1 to 14,
Pages 17 to 60
Pages 63 to 68

For the remaining pages.

In the pdf print menu select the landscape pages.

Pages 15, 16.
Pages 61, 62.

Change the paper size to A3.
Ensure it is set to landscape.

For double sided printing

The pages must be selected in pairs.

Select the 2 sided print menu and select “Flip on long edge”.

Be prepared to experiment with the print settings especially if printing double sided.
