

# DOOR AND WINDOW CONTACTS, AS BURGLAR ALARMS OR SHOP DOOR TRIGGERS.

These afford the best means of protecting house property against the attacks of thieves. We have fitted them in a great many houses, stores, safes, counters, fowl-houses, &c., and they have in all cases given thorough satisfaction.

These Contacts are usually fitted in connection with our continuous ringing bells, as described on page 4, and mostly require a switch in connection, in order to break the circuit when the bells are not required to ring.
