This 2-Speed Drill will work longer, drill further than any comparable Drill of its type.

## *WHY TWO SPEEDS?*

For decades all drills have been designed primarily for metal working and only in recent years have they been adapted for wood working and used at home. Unfortunately, both power and speeds have been lacking to give top performance and Selecta for the first time anywhere in Britain present a fully powered 2-Speed Drill to enable the handyman to attain the maximum performance from his equipment.

The Selecta 4500 2-Speed Drill represents the most outstanding advance in Power Tool design in recent years, incorporating Roller Needle Bearings for smoother running and longer life, and employing Helical Cut Gears for quiet positive operation eliminating any trace of "back-lash." This Drill packs more power into its dimension than any other type on the market.

- \* **FULL T.V. AND RADIO SUPPRESSED**
