

Hallicrafters SX17 Communications Receiver Schematic, showing where possible anotated component values etc.
All capacitors are paper 400v DC working unless otherwise stated, C43, C64 & C65 are electrolytics.
Resistors are .5 watt unless otherwise stated.
Note: !! If replacing C66 replace with a suitably rated "Y" Type,
m = mica.
Note: IF primary tuning capacitors will be LIVE where connected to tube plates.
? = check value fitted.
